

## **About SRC Publications**

**SRC Publications** publishes a wide range of original high quality papers covering fundamental and applied research, critical reviews and case studies. SRC Publications represents the new standard in scholarly publishing: fast and high-quality review, a liberal open access policy that brings publishing to the doorstep of every researcher and student. Every year majority of the research efforts get lost due to lack of effective scientific archival systems. SRC Publications is a global effort to consolidate dispersed knowledge and aggregate them in a search-able and index-able form. In addition to fundamental and applied papers, review articles on important developments will be included. Special issues devoted to international conferences and reviews of books and major reports will be published too.

We provide only soft copy for the accepted paper.

### **Guidelines to Contributors:**

1. Manuscripts are to be submitted to respective journal in MS Word format as per guidelines given in model paper.
